PROJECTS :

PROJECT 1 :

Responsive Personal Portfolio Website

Objective: To design and develop a responsive and interactive portfolio website that show cases personal skills, academic background, and projects in a professional manner. The website aims to create a strong online presence and serves as a digital resume for recruiters and collaborators, with features like dark mode, form validation, and dynamic content display.

Software Used:

- ☐ HTML: Creating, editing, and annotating 2D and 3D architectural drawings.
- ☐ CSS: Ensured stability and strength with better structural analysis and design.
- ☐ JavaScript: Interactive features (dark mode toggle, form validation, dynamic content)

PROJECT 2 :

Weather Forecasting Website

Objective:

To develop a responsive and user-friendly website that provides real-time weather updates and forecasts using external weather APIs.

Software & Technologies Used:

- Frontend: HTML, CSS, JavaScript (or React if you used it)
- API Integration: OpenWeatherMap API (or Weather App API you used)
- Tools: VS Code, GitHub

Key Features:

- Integrated Weather API to fetch real-time weather data.
- Displays current temperature, humidity, wind speed, and weather conditions.
- Provides a 5-day weather forecast with location-based search.
- Implemented search functionality for city-specific weather reports.
- Designed a responsive and clean UI for better user experience
